KANISHAA BARANEETHARAN

Email: cbkanishaa@gmail.com | **Phone:** +91 9080382916
LinkedIn: linkedin.com/in/kanishaa | **GitHub:** github.com/kanishaarbk

Objective:

Aspiring software engineer with a strong foundation in B.Tech (Information Technology) and hands-on experience in developing and deploying robust applications. Seeking to leverage my technical skills and innovative mindset to contribute to product development.

Area of Interest:

1. Full Stack Development (Frontend, Backend, REST APIs)
2. Cloud Computing (Cloud Services, Deployment, Scalable Systems)
3. Data Science & Analytics (Big Data, Data Visualization, Machine Learning)

Education:

Bachelor of Technology in Information Technology | Dr.Mahalingam College of Engineering and Technology, Pollachi
2028 | 8.54

HSC | Bharani Vidhyalaya Sr. Sec School
Year of Completion: 2024 | **Percentage:** 94.6

SSLC | Bharani Vidhyalaya Sr. Sec School
Year of Completion: 2022 | **Percentage:** 90

Skills:

Technical Skills:

- **Programming Languages:** Java, Python, C, JavaScript
- **Tools & Technologies:** Linux, Maven, Power BI, Docker, MLflow
- **Database Management:** MySQL
- Frameworks & Libraries: React.js, Django, Scikit-learn, TensorFlow/Keras, LangChain
- Version control: Git,GitHub, DVC

Soft Skills:

- **Communication:** Excellent verbal, written communication and presentation.
- **Problem-Solving:** Analytical Thinking, Root Cause Analysis.

Projects:

SafeHer | Women's Safety Platform

- Designed a women-focused platform featuring anonymous chat, complaint submission, and community feedback.
- Proposed user verification and admin moderation to enhance privacy, safety, and controlled access.
- Focused on secure data handling, user-friendly navigation, and scalable platform architecture.

RestroManage | Restaurant Management System

- Developed a restaurant management system to streamline order processing, billing, and menu management.
- Integrated database operations to manage customer details, orders, and transaction records.
- Designed a user-friendly interface to improve operational efficiency and reduce manual workload.

Developer Burnout Risk Predictor

- Developed a Random Forest model to predict developer burnout risk using work habits and lifestyle indicators.
- Applied SMOTE and hyperparameter tuning to address class imbalance and optimize model performance.
- Integrated SHAP-based explainability and built an interactive Streamlit dashboard for burnout risk assessment.

Federated Learning-Based Stress Detection

- Designed a federated learning framework using the SWELL-KW dataset for stress prediction across distributed clients.

- Implemented client-side model training and Federated Averaging (FedAvg) to aggregate model updates without sharing raw data.
- Explored non-IID data handling, concept drift detection, and personalized model training.

Vastraa Boutique | E-Commerce Website

- Developed a boutique e-commerce application using React and Django REST Framework.
- Implemented product browsing, product details, shopping cart, checkout, and order management features.
- Worked on payment gateway integration, API connectivity, and security enhancements for online transactions.

School Management Website

- Developed a school website using React and Django REST Framework.
- Built REST APIs to enable seamless communication between frontend and backend components.
- Planned role-based authentication and access management for students and staff.

Virtual Oasis | AI & Virtual Reality

- Developed a local AI assistant using Python, Ollama, and a lightweight large language model.
- Implemented SQLite-based memory management to store, retrieve, and forget user information.
- Built a command-line interface supporting memory operations as a foundation for a personalized AI assistant.

Internships:-

Certifications:

- Certified in Prompt Engineering.
- Certified in Java Script for web development.
- Certified in Linux CommandLine and SQL Data Management.
- Certified in NPTEL course in Management Information System.
- Certified in NPTEL course in Business Development from Start to Scale.

Achievements:

- Pen, Paper and Poems – Published on February 3, 2025
- Won 3rd place in ISTE Student Chapter paper presentation.
- Qualified for final round in Hacksthra'26 and special appreciation on innovation.
- Won 3rd prize in presenting the project idea of virtual oasis.
- Qualified for Institutional level in reverse Engineering project presentation.

Extracurricular Activities:

- Member of Youth Parliament Club, participated in debates and enhanced public speaking.
- Placement Coordinator, INFOBEE – IT Technical Association: Coordinating placement activities, career development initiatives, and placement-related communication for students.
- Engaged in creative writing, composing poetry and literary pieces.
